

AI Career Coach

AI-Powered Career Development & Interview Preparation Platform

Group Members: Ankit Kumar, Anshuman Kumar, Ashwani Sharma, Rajan Kumar

Under Guidance of: Mr. Deepak Kumar (Asst. Prof.)

The Modern Job Search hurdles

Navigating today's competitive job market presents significant hurdles for students and job seekers. Many struggle with foundational aspects of career development.

Skills Gap Confusion

Lack of clarity regarding in-demand skills and industry requirements.

Resume & Cover Letter Roadblocks

Difficulty crafting ATS-friendly resumes and compelling cover letters.

Interview Anxiety

Absence of structured mock interview practice and personalized feedback.

No Progress Tracking

Inability to track personal development and identify areas for improvement.

Introducing AI Career Coach

Our platform provides a comprehensive, AI-powered solution to streamline career development and interview preparation, addressing key challenges faced by job seekers.

Structured Career Onboarding

Guidance from initial career exploration to job application.

AI-Powered Document Generation

Effortlessly create optimized resumes and persuasive cover letters.

Role-Specific Mock Interviews

Practice with AI-driven simulations and receive instant, actionable feedback.

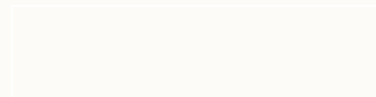

Comprehensive Progress Tracking

Monitor your development with intuitive dashboards and analytics.

Salary & Skills Insights

Access data-driven insights to inform career decisions.

Key Features Overview

AI Career Coach is built around several core modules designed to support every stage of your career journey.

Professional Onboarding

Personalized career path guidance and skill mapping.

AI Resume Builder

Create ATS-optimized resumes tailored to specific roles.

Cover Letter Generator

Generate impactful cover letters with AI assistance.

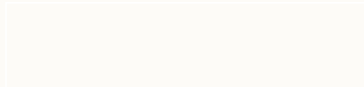

Mock Interview Prep

Simulated interviews with AI feedback for skill refinement.

Progress Tracking Dashboard

Visualize your growth and identify areas for further development.

Professional Onboarding Module

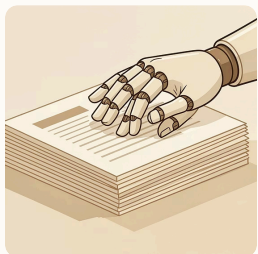

Our onboarding module helps users define their career trajectory by providing crucial insights and personalized recommendations.

- **Career Role/Domain Selection:** Users specify their desired industry or job role.
- **In-Demand Skills Analysis:** The system highlights critical skills required for the chosen path.
- **Salary Trend Insights:** Provides data-driven expectations for earning potential.
- **Personalized Growth Recommendations:** Tailored advice on skill acquisition and development.

AI Resume & Cover Letter Generator

Craft professional application documents that stand out using our AI-powered tools.

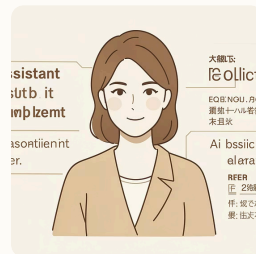

ATS-Optimized Resumes

Generate resumes designed to pass Applicant Tracking Systems, increasing visibility to recruiters.

Industry-Tailored Cover Letters

Create custom cover letters adapted to specific industries and job descriptions.

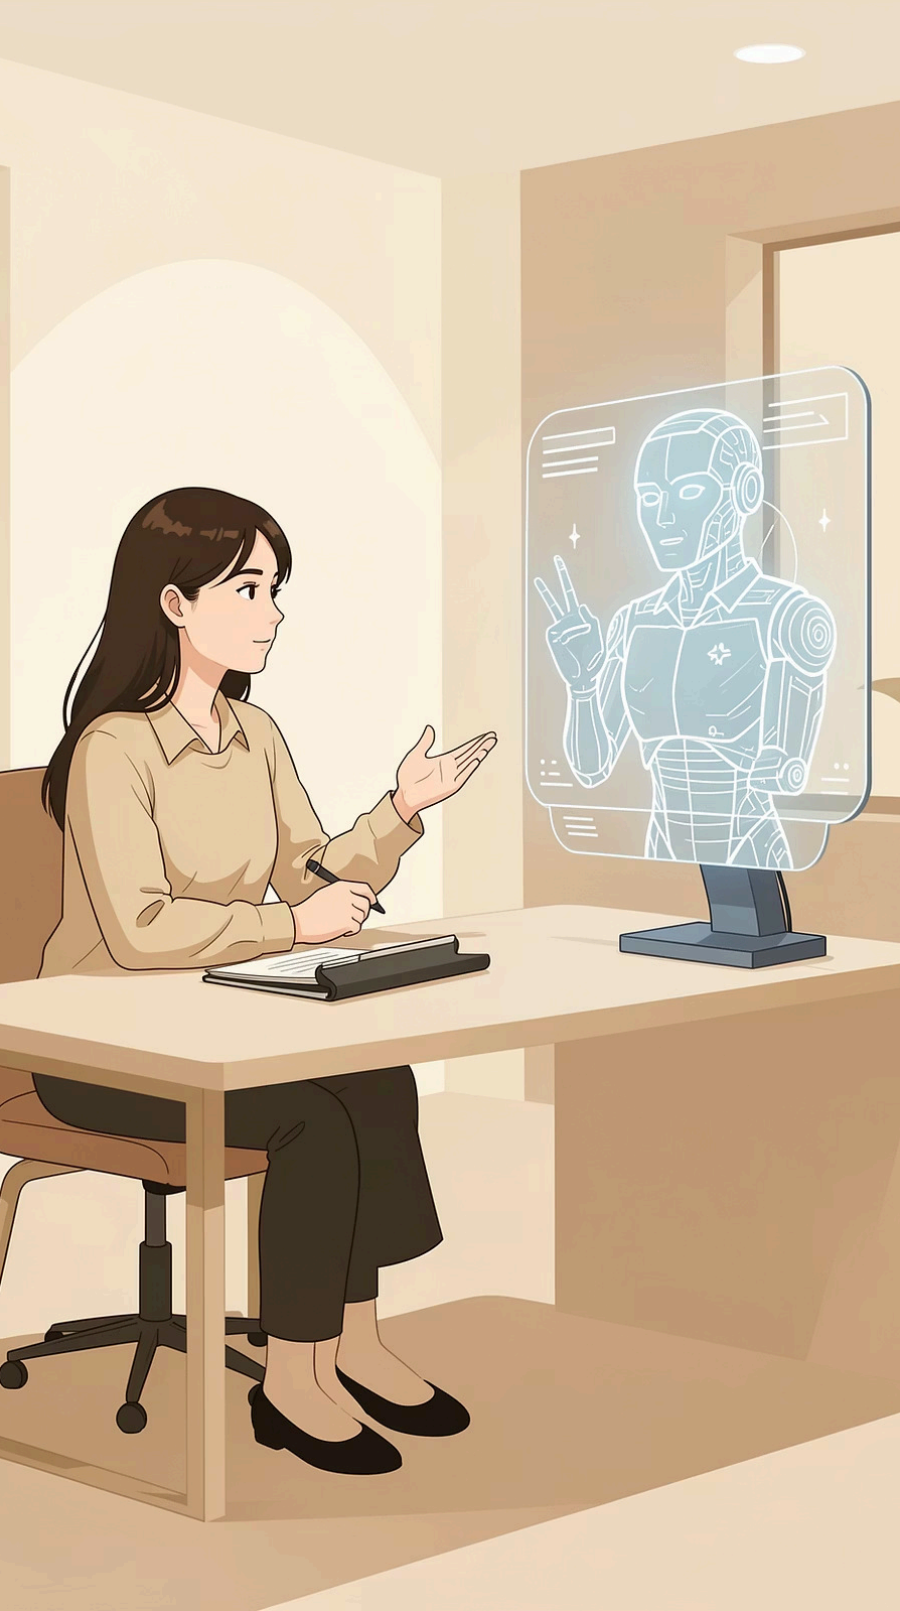

Role-Specific AI Prompts

Leverage AI prompts to ensure content is highly relevant and impactful.

Downloadable Documents

Easily download your perfectly formatted resumes and cover letters.

AI Mock Interview System

Conquer interview anxiety with our intelligent mock interview platform, offering targeted practice and actionable feedback.

01

Role-Specific Questions

Receive questions customized to your chosen career path and industry.

02

Simulated Environment

Experience realistic interview scenarios to build confidence.

03

Instant Practice & Feedback

Get immediate AI-driven insights on your responses and delivery.

04

Performance-Based Improvement

Identify strengths and weaknesses for continuous skill enhancement.

Technologies Powering AI Career Coach

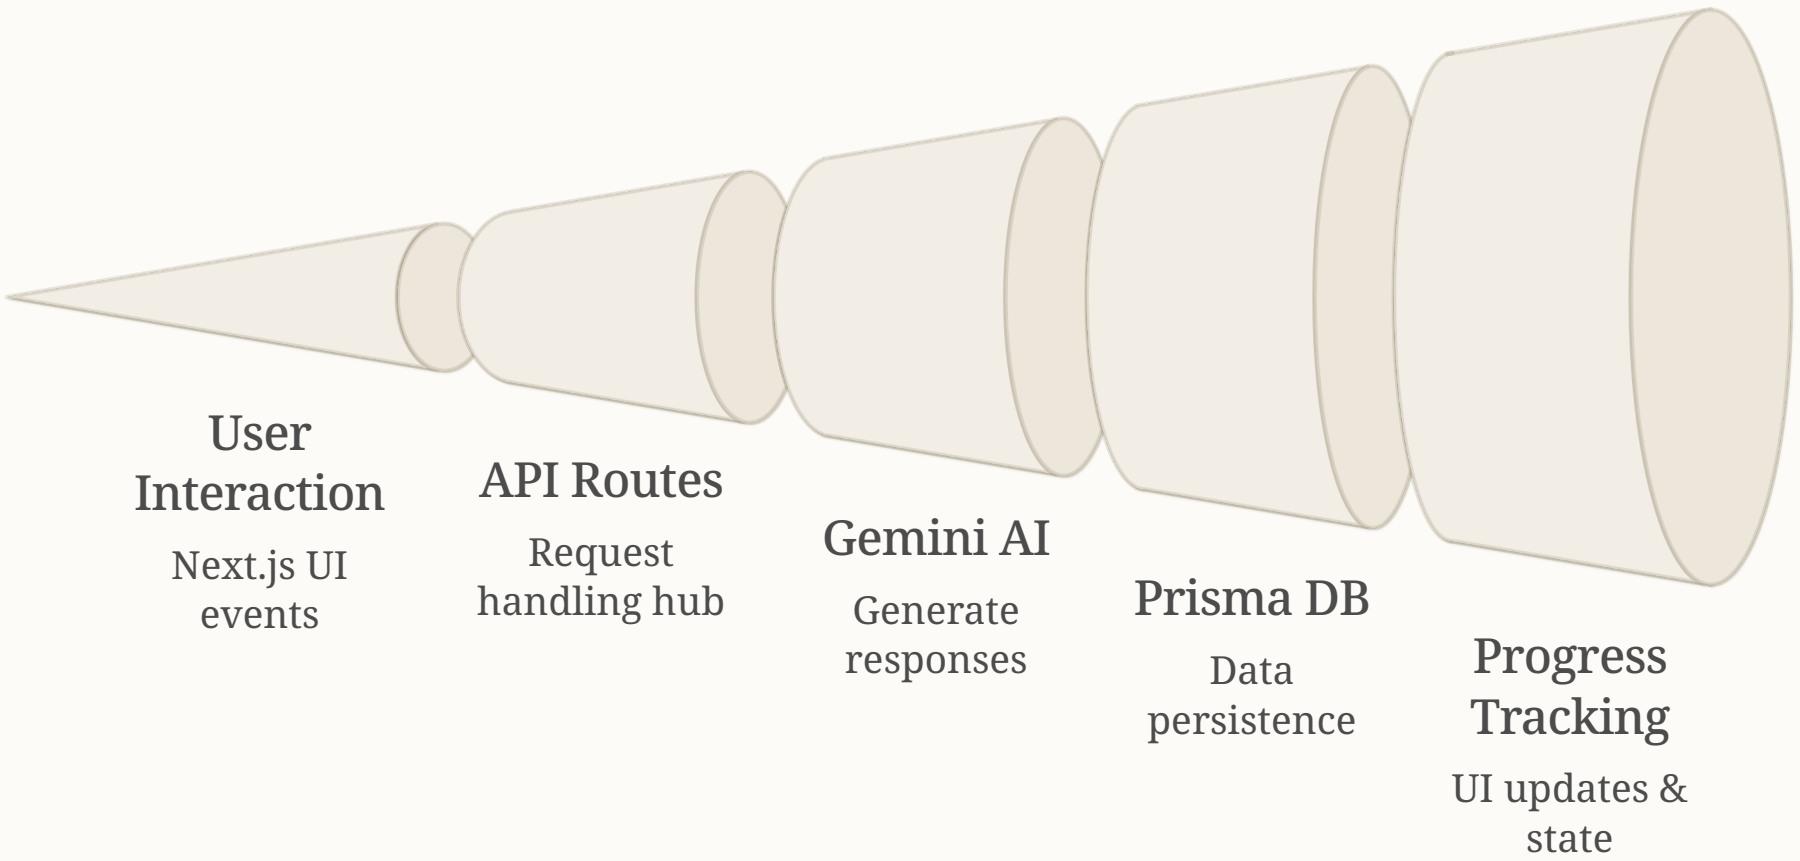

Frontend Development

- **Next.js:** React framework for building fast, scalable web applications.
- **Tailwind CSS:** Utility-first CSS framework for rapid UI development.
- **Shadcn UI:** Reusable UI components for a polished user experience.

Backend, Database & AI

- **Prisma ORM:** Modern database toolkit for robust backend operations.
- **PostgreSQL:** Powerful open-source relational database.
- **Gemini AI API:** Integrates advanced AI capabilities for content generation and intelligent coaching.

System Architecture & Data Flow

Our system employs a modern full-stack architecture ensuring efficiency, scalability, and a seamless user experience. Next.js manages both frontend interactions and API routes, acting as the central hub. Data persistence is handled by Prisma and PostgreSQL, while Gemini AI provides the intelligent layer for personalized content and feedback, all integrated to provide real-time progress tracking.

Conclusion & Future Vision

Conclusion

- **Integrated AI Coaching:** A comprehensive, AI-driven platform designed to empower career development.
- **Enhanced Employability:** Equips users with the tools and confidence to secure their desired roles.
- **Structured Learning:** Provides a clear, guided workflow for effective career preparation.

Future Scope

- **Real-time Job Portal Integration:** Connect users directly to relevant job openings.
- **AI-based Skill Gap Analysis:** Proactive identification of skill deficiencies and learning paths.
- **Advanced Analytics Dashboard:** Deeper insights into user performance and market trends.
- **Multi-language Support:** Expand accessibility to a global user base.
